PROFESSIONAL SUMMARY

Final-year Computer Engineering student with hands-on experience building responsive web applications through personal projects. Comfortable working with React.js, TypeScript, and TailwindCSS, and familiar with REST API integration, state management, and real-time features using Socket.IO. Enjoy writing clean, readable code and am looking to grow further in a collaborative engineering environment.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, TailwindCSS

State Management: Redux, Context API, React Query

APIs & Real-Time: REST APIs, Socket.IO, WebSockets

Routing & Navigation: React Router DOM

Tools & Workflow: Git, GitHub, Postman

CS Fundamentals: Data Structures & Algorithms (basics), Object-Oriented Programming (OOP), Database Management Systems (DBMS concepts)

PROJECTS

FuzzyChat – Real-Time Chat Application (Personal Project)

2026

React.js | TailwindCSS | Socket.IO | REST APIs | React Router DOM

- Built a responsive chat application using React.js and TailwindCSS, focusing on a clean UI that works well across different screen sizes.
- Used Socket.IO for real-time messaging because it handles bidirectional communication out of the box, making it simpler to implement live chat compared to manual polling.
- Integrated REST APIs for user authentication, managing login and session handling on the frontend.
- Set up client-side routing using React Router DOM to give the app a smooth, single-page navigation experience.

StudyHive – Learning Productivity Platform (Personal Project)

2026

React.js | Context API | REST APIs | React Router DOM

- Built the frontend using React.js with a component-based structure, which made it easier to reuse UI elements and keep the codebase organized as features grew.
- Connected REST APIs to pull and display dynamic content, so the platform shows up-to-date data without full page refreshes.
- Used Context API for state management instead of Redux, since the app's data flow was straightforward enough that a lighter solution made more sense.
- Worked on improving page load speed and navigation to make the overall experience feel smoother for users.

EDUCATION

Bachelor of Computer Engineering

2021 – 2025

Pokhara Engineering College, Pokhara, Nepal

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Fluent), Nepali (Native)
